

Announcement and Call for Papers

MULTIPHYSICS 2010

8 - 10 December 2010

Kumamoto, JAPAN

Understanding real physics and performing Multiphysics simulations are extremely important to analyse complex systems in order to better design and manufacture engineering products. The objective of the conference is therefore to share and explore findings on mathematical advances, numerical modelling and experimental validation of theoretical and practical systems in a wide range of applications using Multiphysics.

Authors are invited to submit abstracts of papers up to 300 words containing key objectives and conclusions.

Abstracts should contain the title of the presentation, names of authors, their affiliations including the full contact details of the corresponding author, and some keywords.

Abstract submissions should be made to
email conference@multiphysics.org
or online www.multiphysics.org

Authors of selected abstracts will be invited to submit full length papers for publication in

'The International Journal of Multiphysics'

Exhibition and Sponsorship

Companies interested in sponsoring and/or presenting their most recent developments, products and services in the exhibitions area are invited to email details to conference@multiphysics.org

www.multiphysics.org
